

BRIGHT G SPECIAL GLASS WASHER DETERGENT

BRIGHT G is an alkaline chlorinated liquid product, specifically developed to wash glasses, cups, and flatware. It is formulated with caustics, water softeners and chlorinated agents for easy rinsing.

BRIGHT G has a high sanitizing action as well as a high power to remove persistent stains, like coffee and tea stains.

BRIGHT G is used to clean glasses, cups, and flatware. It can be used in water with a hardness up to 300 mg/L as CaCO₃*

* Hardness	mg/L as CaCO ₃
Soft	0-75
Moderate	75-150
Hard	150-300
Very Hard	> 300

INSTRUCTIONS FOR USE

BRIGHT G is normally used at a concentration of 0.2 – 0.8% at a temperature of 50-60 °C with a minimum contact time of 30 seconds.

Periodically check the nozzles of glass washers for possible obstruction. Periodically descale the washing machine with SCALEOFF.

During the rinsing cycle, add a specific polishing additive in order to accelerate drying and eliminate water hardness stains on the flatware and cutlery.

SHELF LIFE AND PACKAGING

12 months , 5 kg/can and 10 kg/pail

PRECAUTIONS

Please refer to the Material Safety Data Sheet.
