

FRYFIX

DECARBONIZER FOR FRYERS

FRYFIX is a caustic, de-carbonizing degreaser that contains corrosion inhibitors and removes residues of cooked oils and thickened greases from stainless steel surfaces.

FRYFIX is a clear, alkaline liquid with a high sequestration power and low foaming features. FRYFIX does not contain phosphates. FRYFIX is safe on iron, steel, and stainless steel, bronze, copper. Do not use on aluminum parts.

INSTRUCTIONS FOR USE

Mix 10-20% FRYFIX by volume in hot water and immerse the parts to be cleaned.

Concentration depends on intensity of dirt.

Leave the parts in the solution for at least 30 minutes.

Rinse abundantly at the end of the cleaning cycle.

SHELF LIFE AND PACKAGING

24 months , 5 kg/pail and 10 kg/pail

PRECAUTIONS

Please refer to the Material Safety Data Sheet.
