

# RINSEOUT

## ACID-BASED RINSE ADDITIVE FOR GLASS WASHERS

RINSEOUT is a concentrated product developed as an additive for the final rinse cycle of the glass washers. RINSEOUT is an acid-based detergent with surfactants and adjuvants, with strong anti-foaming features to be used in all those cases where a quick drying of glasses, cups, etc. at the end of the washing cycle is required.

Particularly suitable for use with hard waters\*.

* Hardness	mg/L as CaCO <sub>3</sub>
Soft	0-75
Moderate	75-150
Hard	150-300
Very Hard	> 300

## INSTRUCTIONS FOR USE

Use during the final rinse in glass washing machine process, by means of appropriate dosing. Add 8-10 ml per 10 liters of water depending on the grade of hard water.

The temperature of the rinsing cycle must be 80 - 85°C, ensuring the perfect cleaning of the nozzles, in order to obtain an effective drying at the end of the washing process.

## SHELF LIFE AND PACKAGING

24 months , 5 kg/pail and 10 kg/pail

## PRECAUTIONS

Please refer to the Material Safety Data Sheet.
